About This Game

Conventional motor racing has yielded to the advances of thrust drive technology. Popularity for Slipstream racing is at its peak. Successful flyers quickly become icons and heroes. Race fans flock in their millions to the circuit-side stadiums hoping to catch a glimpse of the latest anti-grav machines which defy all laws of motion. The track's prepared, the crowd are hustling for the best seats, and the drivers and commentators are all psyched and hungry for action.

Control many upgradeable futuristic racers under arcade or simulation racing style. Experience high speed aerial moves and dramatic crashes on excellently designed tracks. Feel the speed of the slipstream!

Features:

- Compete as one of 10 different characters with unique Slipstream aircraft, each with their own features, weapons, and flying style.
- Fast-paced action, smooth craft controls, and excellent track design.
- With good old fashion split-screen multiplayer mode, enjoy a retro head-to-head race against a friend.

Dos Flying Racer, basically just decent physics but in a racing setting.

Best to run it on REAL hardware tho, and if you can't do that, Transfer the Game to PCEM

It's a much better accurate x86 emulator than dosbox that even has Awe32 support.. **YOU'RE BETTER OFF PLAYING A PROPER PS1/PS2/NES GAME THAN WASTING YOUR TIME ON THIS TRASH**

0/10 SHAME ON THE GAME DEV. Never ever buy this♥♥♥♥♥♥. A rather unique game that unfortunately didn't age well.

Since it doesn't seem to use hardware 3D (I think it was made before that), advancements in technology didn't improve the graphics.

So unless you already know the game from the time it was fresh, you're probably not enjoying as much.

The main problem the game has are the graphics - for today's standards, they are atrocious.

Still, if you can overlook that, you get a rather unique combat racing game in 3 dimensions (perhaps comparable to Descent).

Still, if you can get it cheap (say 1 or 2 Euro), I'd give it a try.. great game from my childhood and brought back lots of memories and laughs. if super graphics is what you're after don't bother.... but if you had this game as a kid and love the 90's feel then jump into it and feel those old school feels. It still rocks!! Awkward controls, simultaneously too slow and too fast, and it's an authentic 3D first person race from the low-polygon dos days. You already know if you want to play it or not.

Thumbs up for the nostalgia players. I might enjoy it more later after some practice.. A old classic.. Don't expect some cool retro experience. What you get is a game that basically doesn't belong on modern systems, no on Steam, really.

I was feeling nostalgic when I got this and I dont regret it all.

Graphics are of course dated from a game released in 1995.

Choose your ... vehicle ? and race, its that simple.

Each racer has their strengths and weaknesses from being fast but not agile or just being able to hits walls at speed with more frequency there is something for every race style.

As always highy recommends this old gem when its on sale.. I've got this as a present from Indiegala store. This is a game from my youth. I only owned a demo from some computer magazine back then and I replayed the only available track numerous of times. Also females looked great back then. Yes, the graphic hasn't aged well, but I've launched this game recently and it still has it, a really nice flying racing game. Shooting out opponents is still enjoyable and adrenaline is still there. Recommended for everyone who values action before pixel graphic.. It runs on DOS BOX, controls are terrible as typical back in those days. The concept of the game is something i typically enjoy in a racer but this game is way past its days. Exiting to DOS i was met with the command line LOL. Some folks may find this enjoyable especially if you crave old school, but \$5.99 normal price tag is asking to much.. Some good, clean fun. Basically Mario Kart DS but Nyooom. epic and awesome 2 thumbs up ^ _ ^. wasted my money

boring game
